How can you possibly delay the Microsoft Settlement? It appears to me that too much has been made of a successful company that takes care of its employees and the other companies that Microsoft works with in the daily operation.

If you have so much time and money to spend please spend it on companies that take advantage of its employees and the other companies should be important to its day to day operation.

Please settle with Microsoft as soon as possible and let them get on with what they do best. Make products that a tremendous number of United States citizens are very pleased to have at their fingertips.
